

SHRIHARI POTE

Aspiring Software Developer · Python & Full-Stack Web Development

Pune, Maharashtra, India | +91 8600932418 | poteshreehari@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Second-year B.Tech Computer Technology student at Ratan Tata Maharashtra State Skills University with 5 self-directed coding projects on GitHub — spanning a full-stack Flask web app, a JavaScript analytics dashboard, two Python-based tools, and a hand-coded portfolio site. Comfortable across Python, JavaScript, C++, and SQL, with hands-on Git/GitHub workflow experience. Seeking a Software Developer or Web Developer internship to build production-grade features alongside an engineering team.

EDUCATION

B.Tech – Computer Technology 2025 – 2029

Ratan Tata Maharashtra State Skills University, Pune

Higher Secondary Certificate (Science) 2025

Shri Bhairavnath Junior College

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, HTML, CSS, SQL

Frameworks & Tools: Flask, Git, GitHub, Netlify

Core Systems: Computer Architecture (8085 & 8086 Microprocessors), Digital Electronics, Computer Networking

Design: CAD Drawing

PROJECTS

Expense Tracker — Personal Finance Management Tool

Python · Flask · HTML/CSS · CSV | github.com/shriharipote/expense-tracker

- Engineered a dual-interface (CLI + Flask Web UI) expense tracker covering 4 core features — add/delete entries, monthly summaries, category-wise bar charts, and CSV export — by building the backend in Python/Flask with integrated chart visualization and CSV I/O.

Conversion Funnel Dashboard — Analytics Dashboard with Integrated Chatbot

HTML · JavaScript · CSS | github.com/shriharipote/conversion-funnel-dashboard

- Built an interactive, single-page analytics dashboard that visualizes multi-stage user conversion funnels and includes a built-in chatbot interface, by structuring the front end entirely in vanilla JavaScript, HTML, and CSS.

BugFinder — Error Log Analysis Tool

Python | github.com/shriharipote/bugfinder

- Built a Python command-line tool that parses application error logs and flags likely bug patterns for faster diagnosis, by implementing rule-based text parsing and pattern-matching logic.

CareerPath AI — Career Guidance Recommendation Tool

Python | github.com/shriharipote/careerpath-ai

- Built a Python tool that generates personalized career-path suggestions from user-input answers, by designing rule-based decision logic to map inputs to recommended paths.

Personal Portfolio Website

HTML · CSS · Netlify | shriharipote.netlify.app

- Designed, coded, and deployed a responsive 3-section portfolio site (work, services, contact) from scratch using hand-written HTML/CSS, hosted live on Netlify.
